Bioinformatics Core

Biostatistics and Bioinformatics Shared Resource (BBSR)

Cancer Center
NCI-DESIGNATED COMPREHENSIVE CANCER CENTER

About Us

Passionate about empowering your cancer research through integrative omics analysis.

Cancer-focused research support

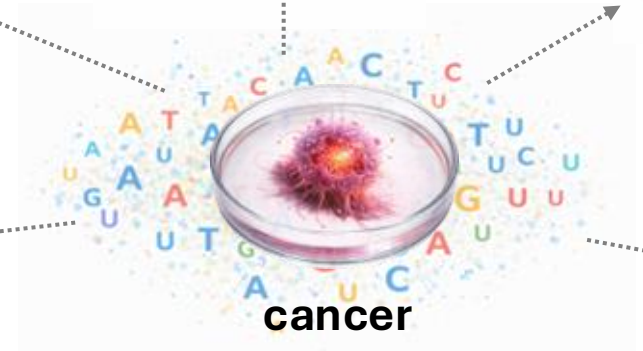
Discounted rates for UCCC members

Our Expertise

Transcriptomics
differential expression, pathway analysis, splicing, fusion detection

Single cell
clustering, cell annotation, trajectory inference, multimodal integration

Genomics
WGS, variant calling, CNV, tumor burden, clonality



Epigenomics
accessibility, peak calling, motif analysis

Spatial transcriptomics
niche and tumor micro-environment analysis

Services Offered

- Design and planning of omics experiments
- Grant development support
- Bioinformatics analysis
- Manuscript preparation
- Data management
